

Biophilic Design

Spring 2019 – Arch 498a/598b

Judith Heerwagen with Dean Heerwagen and guests

3 credits – Mondays @ 6:00-8:20 pm

Which view would you rather have? (and why it matters)

This class will **integrate biophilia and sustainability** into a coherent conceptual framework that can serve as a basis for design and planning.

The study of biophilia focuses on the impact of natural environments on human health and well being. The class will address how to turn biophilia research findings into practice in a range of settings to enhance human physiological, emotional, and social experiences in the built environment.
